**Reasons for Allowance**

The following is an examiner's statement of reasons for allowance: None of the prior art of record teaches or suggests a multifunction meter with all of the limitations of independent claim 1, especially the limitation specifying that "each of the individual displays is configured to display at least the data indicative of engine operation and the data indicative of power output of the power converter". None of the prior art of record teaches or suggests a welding type apparatus with all of the limitations as set forth in independent claim 12, particularly the limitations directed to toggling the display of the multifunction meter between engine condition data and power signal data as set forth in the claim. None of the prior art of record teaches or suggests the welding type apparatus with all of the limitations set forth in independent claim 26, especially the limitations directed to "a single set of meters to display volts and amps of the electrical power " and the "means for on demand displaying of engine condition data on the single set of meters". Although the patent to Jordan discloses the display of both power data and engine data, this data is displayed simultaneously on a single screen. There is no disclosure of displaying either one of power data or engine data on a single display, single meter, or single set of meters as called for in applicant's claims. The dependent claims are considered allowable at least because they depend from one of independent claims 1, 12, or 26.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
